

RAJESH S

+91 93452 68271 | sivarajesh2404@gmail.com | Chennai, Tamil Nadu | github.com/sivarajesh | linkedin.com/in/sivarajesh

PROFESSIONAL SUMMARY

Results-driven Data Analyst with hands-on experience in Python, PostgreSQL, Excel, Pandas, NumPy, data cleaning, data analysis, statistical analysis, and data visualization. Experienced in developing data-driven projects involving data preprocessing, exploratory data analysis (EDA), machine learning, and reporting. Proficient in transforming raw data into actionable insights using analytical tools and techniques. Familiar with Power BI, dashboard development, ETL workflows, Git, and database management. Eager to contribute analytical, problem-solving, and data-driven decision-making skills as a Junior Data Analyst.

TECHNICAL SKILLS

Programming & Data Analysis: Python, Pandas, NumPy, Matplotlib, Seaborn, HTML5, CSS3

SQL & Databases: PostgreSQL, MongoDB

Data Visualization: Power BI, Tableau, Excel Charts, Dashboards

Microsoft Excel: Pivot Tables, VLOOKUP/XLOOKUP, INDEX-MATCH, IF Functions, Data Cleaning

Statistics: Descriptive Statistics, Mean, Median, Mode

Reporting: Data Visualization, Dashboard Development, KPI Reporting, Business Reporting

Tools & Technologies: Jupyter Notebook, Git, GitHub

INTERNSHIP EXPERIENCE

Python Full-Stack Developer Intern

Jun 2025 – Jul 2025

Femtosoft Technologies · Chennai

- Built and deployed 3 full-stack web applications using Python Flask with MVC architecture, integrating MySQL and MongoDB databases, reducing average data retrieval latency by 30%.
- Designed and tested 15+ REST API endpoints using Postman; implemented server-side validation and structured error handling following production-ready coding standards.
- Maintained a clean, version-controlled codebase via Git across all sprint deliverables in an agile team environment with documented commit history.

Web Development Intern

Jul 2024 – Aug 2024

INTERNPE · Remote

- Engineered 5+ responsive, cross-browser-compatible web interfaces using HTML5, CSS3, and JavaScript; applied Flexbox/Grid layouts achieving consistent rendering across Chrome, Firefox, and Safari.
- Implemented semantic markup and WCAG-compliant UI/UX design principles; optimised CSS and eliminated render-blocking resources to improve page load efficiency.
- Delivered all project milestones on schedule, receiving positive feedback for code readability and component reusability.

Business Development Associate Intern

2024 (1 Month)

BDA Organization · Chennai

- Executed lead generation and CRM data management workflows; maintained 100% data accuracy across client records and strengthened cross-functional communication and analytical skills.

PROJECTS

NLP-Based Hate Speech & Toxic Comment Detection

github.com/sivarajesh

Python · Scikit-learn · TF-IDF · Flask · REST API · Postman · Git

- **Problem:** Manual content moderation is slow and unscalable across high-volume platforms.
- Built a multi-label text classifier (TF-IDF + Logistic Regression) achieving **91% accuracy** across 6 toxicity categories on a 150K+ comment dataset (Kaggle Jigsaw).
- Deployed via Flask REST API with avg. response latency under 200 ms; integrated JSON-based request/response pipeline suitable for production CMS integration.

TripAlert Pro – Real-Time Travel Safety Platform

github.com/sivarajesh

HTML5 · CSS3 · JavaScript · MongoDB · REST API · Render · Vercel

- **Problem:** Travelers lack instant access to route safety data and emergency resources.
- Developed a full-stack web app with live route safety alerts and geolocation-based notifications; stored and queried 500+ location records in MongoDB with indexed queries.
- Reduced alert retrieval time by **40%** through MongoDB index optimisation and async JS fetch calls; deployed backend on Render and frontend on Vercel with 8 documented API endpoints.

Dual-Mode AI Chatbot

github.com/sivarajesh

Python Flask · JavaScript · HTML5 · CSS3 · REST API · JWT

- **Problem:** Generic chatbots fail users who need both professional Q&A; and casual conversation in one interface.
- Engineered a mode-switching Flask backend with intelligent intent routing — automatically classifies requests and adapts response logic, improving session engagement by **35%**.
- Implemented JWT-based session management; achieved <100 ms round-trip API latency across 50+ tested conversation flows with zero session bleed-through.

EDUCATION

B.Tech – Information Technology

S.A. Engineering College, Chennai

2022 – 2026

CGPA: 7.50 / 10.0

CERTIFICATIONS

- Full Stack Development – Client Side (Frontend)
- Full Stack Development – Server Side (Backend)
- Python with MongoDB – Database Integration & NoSQL
- Kotlin & Python Programming Fundamentals
- Web Development Workshop – Responsive Design & Best Practices

ADDITIONAL INFORMATION

Languages: English (Professional Proficiency) · Tamil (Native)

DSA Practice: Actively solving LeetCode problems – Arrays, Strings, HashMaps, Recursion

Open Source: Personal GitHub repositories with documented READMEs and live project demos

Availability: Immediately available for full-time roles · Open to Hybrid / In-Office / Remote
